Ferro battuto: Metallo Prezioso®
Wrought iron: Beautifully Secure®

Fin dall'antichità, la capacità di domare un metallo duro e scorbuto quale il ferro e di cambiarne le caratteristiche meccaniche per mezzo della forgiatura e della tempra, ponevano il fabbro, così come il medico o l'astrologo, a far parte di quella categoria di uomini il cui lavoro, importantissimo per il resto dell'umanità, abbisognava di un qualche contributo divino per riuscire al meglio, e pretendeva quindi un rapporto speciale,

magico, con gli Dei.

The ability to forge this hard metal by changing its mechanical characteristics, put the Blacksmith on a level with the Doctors and the Astrologers. Their importance to humanity, and their affinity with the

Gods was necessary to ensure the healing of their patients.

The Blacksmith needed the same affinity enabling the metal to be

blessed and therefore not to break in battle. This requirement was hardly surprising when you consider the importance of a sword remaining strong during close combat. So was born the image of the blacksmith as a man, particular in his ways, strong and sometimes brusque, but capable of winning the fight. His materials, rough and unworkable at

the beginning, became so improved by him that the Gods allowed him to over indulge himself with wine. Not so different after all from their powerful father figure Hephaestus (Vulcan) the husband of the beautiful Aphrodite (Venus), God of the Earths interior and respected by Zeus (Jupiter), father of the Gods.

MALO - VICENZA - ITALY - CIRCA 1994

Le garanzie di bellezza, sicurezza ed ornamento, che per millenni ha dato il metallo più abbondante ed utile della terra, non sembrano meno importanti per l'uomo odierno di quanto lo fossero per l'antico. Sembrano, anzi, connaturate al suo esistere. Sì! Può ben darsi che ci sia qualcosa di "magico" nel Ferro Battuto, che lo farà restare al suo posto, vicino all'uomo, per alcuni altri millenni.

The guarantee of elegance and ornamental security given by the most useful and abundant metal on earth for over 2000 years does not seem to be any less important to modern man than it was to his forefathers.

It seems instead to be part of his existence. Yes! It could well be that there is something magical about wrought iron

that will keep it in its place, close to man, for the next thousand years.

Decenni di serio lavoro con un metallo così duro e scorbutico epperò capace di "magici" risultati hanno fatto sì che l'azione progettuale sia, in effetti, un'azione d'amore. Amore per l'arte, amore per il bello, amore per il Ferro Battuto.

Designing with a metal as hard and stubborn as iron is always a matter of love.

Love for art and beauty, but also for one's painstaking professionalism.

Ogni nostro manufatto nasce dalla più seria ed attenta progettazione di esperti architetti ed è singolarmente garantito del più elevato livello di qualità.

Each and everyone of our handiworks is guaranteed to have been produced at the highest possible level of artistic craftsmanship.

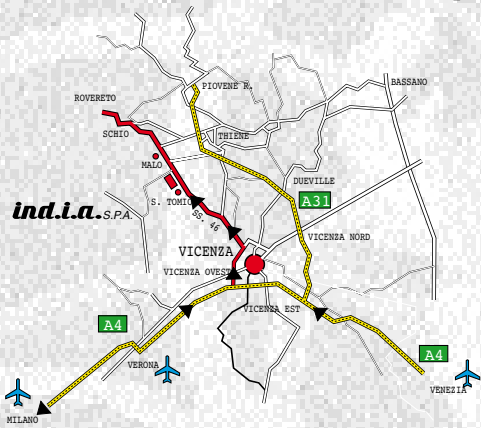

Una realtà in continua crescita

- Sede a Malo-Vicenza (Italia)
- 4 Stabilimenti produttivi
- 64.000 m² coperti
- Oltre 1100 tra dipendenti e collaboratori
- Filiali in Francia, Svezia, Croazia, Brasile, USA (Miami, Houston e Las Vegas), Russia, Spagna, Ucraina, Romania, Argentina e Messico.
- 3.900 t./mese spedite (dati 2006)
- 40 milioni di semilavorati venduti mediamente in un anno
- Oltre 2000 clienti grossisti in 136 stati nel mondo; presumibilmente 150 mila fabbrici usano il nostro prodotto
- Libri cataloghi N ° 11 per pag. 4300 totali
- Oltre 30.000 pezzi diversi a stock e in computer molti dei quali brevettati
- 1 CAD 3D

An ever growing presence

- Headquarters in Malo -Vicenza -Italy
- 4 production sites totalling 64.000 Sq.Mt. of warehousing and production.
- Over 1100 employees
- Subsidiaries with stocking facilities in France, Sweden, Croatia, Brazil, U.S.A. (Houston-Texas, Miami-Florida and Las Vegas-Nevada) Spain, Russia, Ukraine, Romania, Argentina and México.
- 3.900 Ton/month shipped in 2006
- 40 million pieces of ready made wrought iron components sold per year
- Over 2000 stockist customers served, in 136 different countries. Presumably 150.000 fabricators using our forgings during a year.
- 11 catalogs-books for a total of 4300 pages
- Over 30.000 wrought iron components available in catalogs -computer and inventory
- 1 CAD 3D

Leader di mercato

- Una leadership nei 5 continenti
- Una presenza in 136 Stati (2006)
- Una gamma di oltre 30 mila articoli

World market leader

- A 5 continents' leadership
- Exports to 136 countries (2006)
- A product range of over 30.000 items

Il calore che emana
da modelli e forme,
perfezionati anno dopo anno,
secolo dopo secolo,
possono ora far parte
dei Vostri lavori in ferro battuto
ed entrare nelle Vostre case.

*Warmth that comes from
shapes and designs
developed throughout the years
and perfected over the centuries
can now be part of your schemes
in wrought iron and used again
in your homes*

L'idea "SECURIND" nasce dalla esperienza di una ditta leader nel campo della recinzione e delle grate ornamentali in ferro battuto, **PER DIFESA DI PORTE E FINESTRE.**

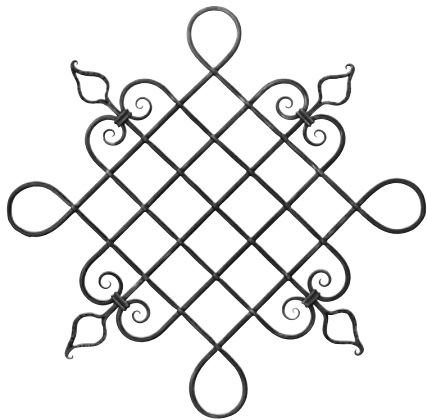

Il sistema di fissaggio **SENZA SALDATURE**, garantisce una perfetta resistenza della grata e contemporaneamente l'impossibilità di rimuoverla grazie alla **VITE A ROTTURA ANTIFURTO.**

Offre, a tutti, la possibilità di installare una splendida protezione, scegliendo tra i vari modelli e abbinamenti, unendo alla bellezza e alla sicurezza del ferro battuto, il risparmio ed il piacere del "FAI DA TE".

The "SECURIND" idea comes from the experience of a leading company in the field of wrought iron enclosures and ornamental gratings for the protection of doors and windows.

The fixing system **WITHOUT WELDING** guarantees perfect grating resistance and, contemporaneously, the impossibility of it being removed thanks to the **ANTITHEFT SPECIAL SCREW.**

Today, you are offered the possibility of installing a splendid protection, choosing from a variety of models and matching elements, combining the beauty of wrought iron with safety and, at the same time, saving on costs with the satisfaction of doing it yourself.

Dalla collaborazione tra gli studi d'architettura ed il nostro ufficio tecnico nascono spesso porte e finestre di altissimo livello estetico-qualitativo.

Cooperation between architects and our forging technicians often leads to beautiful doors and windows results.

Arteferro News

IL GIORNALE DEL FABBRO - THE BLACKSMITH JOURNAL

Per un'azienda che si è conquistata il ruolo di leader nel proprio settore, ed è così capillarmente presente in tutto il mondo, è necessario mantenere sempre vivo il contatto con i propri clienti.

Arteferro News è nato con questo intento: creare un filo diretto tra la ditta IND.I.A. e gli utilizzatori del Ferro Battuto. Questa pubblicazione è lo strumento attraverso il quale tutto "gli innamorati e professionisti del Ferro Battuto" vengono periodicamente informati di tutte le novità produttive di tutte le notizie riguardanti il mondo del Ferro Battuto.

Ogni uscita è accompagnata da informazioni su di una serie di prodotti tra i più utilizzati, che sono illustrati nella sezione riservata alle "Occasioni da non Perdere", disponibili presso i nostri distributori.

For a company that is world leader in its field, and with such a widespread presence in the whole world, it is necessary to always keep the relationship with the client "alive".

Arteferro News was born for this purpose: to create a direct contact between Ind.i.a. and all the wrought iron workers.

This publication is the instrument through which all the "lovers" of wrought iron and professional craftsmen are able to periodically receive information on all the latest news regarding the new productions and everything to do with the wrought iron world.

With each publication there will be an information sheet with a series of articles that are most utilized, which are printed on the "Offers you cannot Refuse", and all of these articles will be available through our distributors.

In ogni numero di questa pubblicazione è inserita una scheda illustrata perforata (per poter essere facilmente conservata e poi consultata), che riporta esempi di lavori finiti di vario genere che servono da spunto per realizzarne di nuovi, seguendo l'esempio di altri Maestri del Ferro Battuto.

Also with each number there will be an insert, already pierced (so that it can be filed), which will have finished works of various sorts, this will serve as an idea to realize new works, following the example of the Masters of Wrought Iron.

IND.I.A. vuole avvicinarsi ancora di più ai propri clienti con una pubblicazione che è "al servizio" degli utilizzatori finali e dei progettisti.
IND.I.A. wants to approach its clients even more with a publication, which is aimed at the final user of the products and the designers.

ANCORA UN CATALOGO? "HOMO FABER 2"

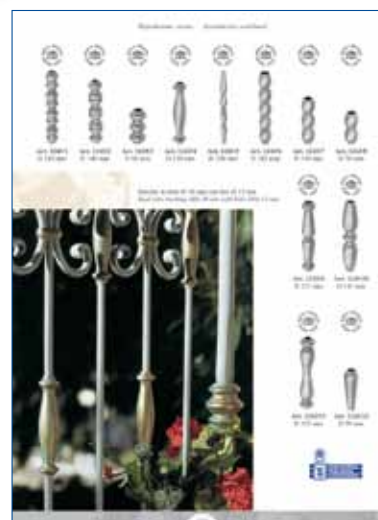

528 Pagine contenenti foto singole, dati tecnici e foto applicative di oltre 3000 articoli "tutti" regolarmente in produzione e disponibili con pronta consegna.

ANOTHER CATALOGUE? ("HOMO FABER 2")

528 pages showing actual pictures, technical data and example pictures of more than 3,000 ready made forgings steadily produced in our own factories and readily available for delivery.

ANCORA UN CATALOGO?

700 Pagine contenenti foto singole, dati tecnici, suggerimenti tipologici e Foto APPLICATIVE di oltre 4000 articoli in Ferro Battuto per la gran parte di "nuova concezione". Uno sforzo come mai fatto prima, nell'Arte del Ferro Battuto, di offrire ai progettisti ed ai fabbri disegni nuovi e sensibilità interpretative più adatte ai nuovi progettisti ed al nuovo far abitazione.

STILL ANOTHER CATALOGUE?

700 Pages full with photos, technical data, actual applications on fences, grills, doors etc. of over 4,000 ready made Wrought Iron forgings. The most important effort ever done in the field of Wrought Iron was to offer Architects and Fabricators several totally new lines of items in Wrought Iron that were, thought, studied and designed to better fit the NEW NEEDS of today's buildings.

Vol. 4° FABER FERRARIUS

da pag. / from page 1611 - a pag / to page 1986
FABER FERRARIUS

Ultimo nato in casa "Ind.i.a." questo catalogo presenta le ultime novità della nostra produzione.

Non è un semplice catalogo di articoli, ma un libro dove la storia, e la passione per questo lavoro apparentemente "grezzo" si intrecciano. Infatti tutti i nostri cataloghi non vengono mai sfogliati, ma letti come un libro.

Un migliaio di foto raccontano di un lavoro nato trent'anni fa, e cresciuto sino ad affacciarsi prepotentemente al nuovo millennio, sempre con idee innovative e competitive, in grado di soddisfare le nuove realtà economiche mondiali.

This catalogue, Ind.i.a.'s latest creation, which presents the novelties of our production. It is not just a catalogue, but a book where history and passion for such an apparently "rough" job have become entwined. In fact our catalogues never get only browsed through but read as a book.

A thousand photos tells of a job started thirty years ago and grown overwhelmingly into the new millennium, always with innovative and competitive ideas to satisfy all new economic realities.

La continua ricerca di nuove forme e di nuovi sviluppi dell'antica tradizione del ferro battuto, la continua attenzione verso le nuove esigenze espresse dal mercato, la continua volontà di essere un costante punto di riferimento per tutti professionisti della progettazione e del design che sempre ha contraddistinto la produzione ind.i.a. spa anche attraverso lo studio e l'utilizzo di nuovi materiali hanno prodotto questo

Art. 3005/70
Italiano - Inglese
Italian - English

quarto volume del catalogo generale ricco, come i precedenti, di immagini applicative a colori di tutti gli articoli in esso raffigurati (piu' di mille), di informazioni e di suggerimenti.

The endless search of new forms and developments of the ancient Wrought Iron tradition, the constant attention towards all new needs brought forth by the market, the strong will to be the ever present point of reference for all planning and designing professionals that has always characterized IND.I.A.'s production, also thanks to the studying and the use of new materials, generated this forth volume of our general catalogues. Like the previous catalogues, it shows, for all the presented items (more than one thousand), applicative colour photos, information and suggestions.

REQUISITI MINIMI Hardware e Software
MINIMUM HARDWARE AND SOFTWARE REQUIREMENTS

Arteferro CAD 3D

Il software è un valido e semplice aiuto, alla portata di tutti gli utenti, nella progettazione di composizioni in ferro battuto. Questo programma non necessita di alcun motore grafico o di applicativi CAD® pre-installati, in quanto è esso stesso un sistema completo per progettare:

CANCELLI - RECINZIONI - PORTE - FINESTRE - SCALE

Il programma genera un ambiente grafico completamente tridimensionale e gestisce una vasta libreria di articoli in 3D depositati e di normale produzione Ind.i.a. spa.

Tramite una semplice maschera di inserimento dati è possibile realizzare in pochissimi minuti un modello tridimensionale che, una volta realizzato, può essere modificato in tempo reale cambiando i parametri, sia tecnici che estetici, inseriti precedentemente.

Il programma consente inoltre di inserire come sfondo della composizione un'immagine/fotografia in possesso dell'utente, questo, assieme alla resa grafica semplice e intuitiva, consente un'immediata visualizzazione del prodotto finito nel contesto dove andrà a collocarsi.

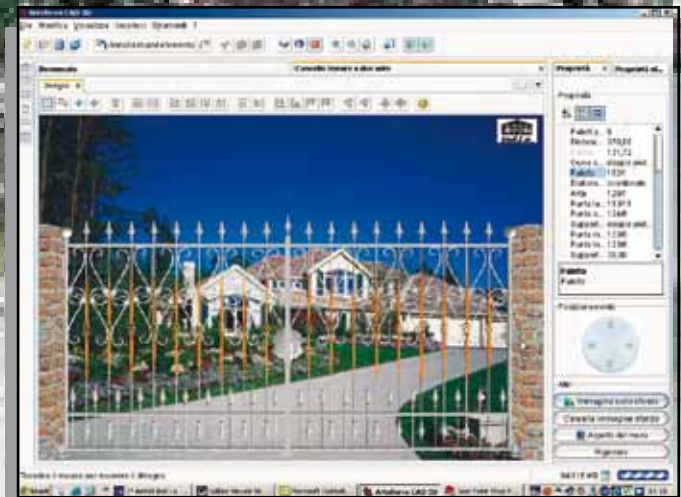

Il programma viene fornito attraverso un supporto CD e una chiave hardware USB. Il software prevede la possibilità di aggiornamento tramite collegamento al sito web www.arteferrocad.com

The software has been conceived as a brand-new easy technical tool for everybody, a strong help to anyone interested in projecting finished jobs using wrought iron elements. It doesn't need any kind of graphic engine or CAD® application as it is a complete drawing system. Very simple and intuitive to use, it enables the user to draw:

GATES, RAILINGS, DOORS, WINDOW GRILLES and STAIRWAYS

in an extremely detailed way, with the possibility of advanced personalisation, using an image/photo given by the final customer; visualizing the finished product in a tridimensional landscape. By means of a simple data form entry it is possible to obtain in very few minutes a tridimensional model that can be modified in real time, changing the technical or aesthetic parameters originally used.

The whole package: installation CD, hardware USB key, user license and serial number. It will be possible to up-date the software with all improvements and new elements that we realize directly from the Web site: www.arteferrocad.com
